It appears that our county officials actually do discriminate between tax payer. As near as we can ascertain without visiting the courthouse our present representative not paid his taxes for years, and present is delinquent to the amount \$830.41. This matter is certainly worthy of the pious consideration of our county dade, even if Mr. Davis is a contributing member of the democratic party, and an office holder in the same. The wealthy are able to pay taxes than the poor, and instead of being stringent with those who are delinquent two or three dollars, we think it would look more honorable to commence with those whose delinquency is the greatest.
